

TANZANITE

– 1000 TIMES RARER THAN DIAMONDS

Tanzanite is one of the most intriguing and desirable precious gemstones of modern times possessing incredible beauty. It is found in only one place on earth, deep in the foothills of Mount Kilimanjaro in Tanzania, East Africa. Tanzanite is rated as a precious gemstone.

New York's celebrated jewellers, Tiffany & Co heard about the discovery of Tanzanite and were the first to bring the dazzling new gemstone to the world. Those who buy tanzanite in the next 15 – 20 years will therefore be the last of its first time owners.

The Mark of Rarity

Every genuine tanzanite product comes with a tanzanite foundation tag.
